

# Less rubbish - let's go

## Tipp:

reuse – wiederverwenden  
 recycle – wiederverwerten  
 repair – reparieren  
 rubbish – Müll  
 residual waste – Restmüll

People produce lots of rubbish, like paper, plastic and broken toys. To reduce this rubbish we can reuse, recycle and repair things. Do you know what these words mean?

**Read the texts and match them to the right word.**

reuse

recycle

repair

When something is broken, we do not throw it away. We fix it.

We use things more than one time – like a glass water bottle or our school snack box.

We turn old rubbish into something new – like a plastic water bottle into a new toy.

These recycling bins help us know what we can recycle.

**Label and colour the bins correctly.**

metal/plastic      paper      glass  
 residual waste      compost

red      black      yellow  
 green/white      brown
